Escobedo Skin Center--First in Austin to offer the NEW Smartlipo (Smart lipo) MPX 46 Watt dual laser lipo device

Austin, TX September 16, 2009--The Escobedo Skin Center will be the first in Austin to use the new 46-watt Smartlipo MPX, which has been proven to melt fat away 50% faster and give patients unparalleled safety.

"I am extremely pleased to offer the most advanced and fundamentally sound Smartlipo device on the market," Dr. Escobedo said. "I have waited for this day a long time. Older versions of Smartlipo or single wavelength devices do not produce enough energy for efficient fat removal."

The machine uses lasers to liquefy larger areas of fat in half the time of its 32-watt predecessor. The ThermoGuide system ensures superior safety, working harmoniously with the laser to sense energy output and keep it within manageable levels.

The benefits don't stop with the procedure. Patients can return to normal activity much faster and without heavy swelling from traditional liposuction. Smartlipo MPX will remove fat, tighten skin and sculpt the body like never before.

About the Escobedo Skin Center and Dr. Michael Escobedo:

The Escobedo Skin Center celebrates ten years (2009) of service to Central Texas and offers a variety of skin treatments, including Thermage™ NXT, Vaser Lipo™, Zerona®, Smartlipo MPX™, Fraxel® re:pair, Fraxel® re:store, BOTOX® injections, Dysport™ injections, Restylane®, Perlane®, Evolence®™, Radiesse®, Sculptra™, Epilight™, Photo-facial, and Juvéderm™ among others. Dr. Escobedo was one of the first to use Thermage®, Captique™, Photo Dynamic Therapy and IPL (intense pulsed light) to eradicate sun damaged skin, improve skin texture and reduce wrinkles. Dr. Escobedo's cosmetic and longevity practice is featured in the book about Austin's high-tech start-up companies: From Waterloo to Silicone Hills: The Story of Austin.
